BUG BASH

Bug Bash

Live hacking events with elite security researchers

Bug Bash is a fully-managed solution for hosting and collaborating with top security researchers from around the world—live.

WHAT

Bug Bashes are in-person, 1-2 day events that bring hackers and customers together in a high-intensity, highly collaborative bug bounty-style program managed by Bugcrowd.

WHO

Bug Bashes utilize swag, production value, entertainment, and other engagement levers to attract top talent. An invitation is seen as the ultimate achievement by many hackers.

HOW

Our expert team of event planners, hacker success managers, and solution architects can deliver a high-production Bug Bash in nearly any location. We handle all the details...you just supply the bugs!

"Our IT team was very pleased with the results of our first Bugcrowd Bug Bash featuring elite security researchers from around the world. The wisdom of the Crowd, combined with Bugcrowd's powerful technology platform, provided ongoing benefits by greatly strengthening our security posture, and we look forward to continuing working with its skilled crowdsourcing team going forward."

ANTHONY MOISANT CIO/CSO • Indeed

"I definitely recommend a Bug Bash event for any organization looking to squash a ton of bugs in a short amount of time."

@cha5m Hacker

"Bug Bash gave me the chance to hack with real-time access to program engineers, helping me dive deeper into the targets and produce findings that I would never have otherwise discovered."
