

# Managed Migration to Bugcrowd

Let us move and improve your bug bounty program quickly and painlessly

**Migrating your bug bounty programs to a new platform shouldn't give you a headache. Bugcrowd offers a fully managed migration program at no extra cost.**

Our Customer Success Team helps you complete your migration in roughly two weeks from project kickoff, using your investments and progress to date as a foundation for the process.

That's not all. We'll make your long-term success and satisfaction our top priorities. Using data-driven insights as our guide, we're committed to helping you launch, manage, grow, and get value from your programs over time.

**Your complimentary, fully managed migration includes the following:**

#### Hacker outreach (if needed)

Hackers you know and trust are likely already hunting on Bugcrowd, so they can pick up where they left off, meaning you don't lose any meaningful hacker relationships and progress. If needed, we'll recommend ways to improve crowd composition and engagement so you can be sure you have the right hackers working on your programs.

#### Data export/import

Next, we'll analyze reports you provide and import user details, roles, access levels, and data about known and remediated vulnerabilities into the Bugcrowd Platform.

#### Strategy review

We'll review the goals of your current program and any existing integrations. Then we'll share expert recommendations based on our decade of experience in customer success, and help you adjust scope, reward levels, or other things as needed.

### Bugcrowd's Managed Migration Program

✓ Fully Managed

✓ Expert guidance

✓ No extra cost

✓ Done in ~2 weeks

### Average Migration Timeline

## Bugcrowd Platform

The Bugcrowd Platform fuses AI with real-time, crowdsourced intelligence from the world's top ethical hackers, pentesters, and red teamers (aka The Crowd), as well as from automated tools that generate asset, threat, and vulnerability data. The powerful combination of human creativity and automation empowers you to continuously:

### Agility

#### Augment Your Team On Demand

- ✓ Attacker mindset on tap for vulnerability discovery, pen testing, and red teaming
- ✓ 350+ skill sets and certifications available
- ✓ Crowd curation and activation guided by data and AI

### Awareness

#### See and Prioritize Emerging Threats

- ✓ Continuous vulnerability intake, validation, and triage at scale
- ✓ 24/7 triage coverage with same-day response for P1s
- ✓ Early warning of emerging vulnerabilities

### Resilience

#### Continuously Improve Security Posture

- ✓ Actionable reporting, benchmarking, and recommendations
- ✓ Directly integrates with existing tools for change at DevOps speed
- ✓ Deep bench of solution & support specialists at your side for quick wins and long-term ROI
